TomTom Europe 905.4799, 3 mts. .Q: How can we get intellij json schema or c# auto generate code in intellij 2016 I am using vscode. It has IntelliJ json schema and C# auto generator which are really really useful. However, I've just bought intellij 2016 and neither of them is supported here. So I've tried to find plugins in intellij marketplace but it doesn't find any. I also tried the c# plugin. It seems that both plugin support js and scala? I just want to find out is there any plugin that support intellij 2016 or both js and scala? A: I believe the C# plugin supports js and scala in 2018.0.1 - see the support for .NET Core 3.0. However in 2016.3.1.1 the JavaScript Support is compiled into the IntelliJ Core and is not separate plugin. If you want to get the whole SIDEs feature set including C#, JavaScript, Java, Python, PHP, Ruby, etc... (and the respective version notes) you can download an unofficial 1.6.0-SNAPSHOT version here. Q: Javascript: how to concatenate strings with numbers? I am trying to write a programme in javascript that takes a numerical parameter and concatenates it with the output of a formula. The formula is: A^B/C For example, If I enter 4 as the parameter, the output should be 0.8. A=the parameter, B=the power, C=the constant, and A^B/C =the output. I know how to do it with only numbers. I was just wondering if it is possible to do it with numbers and strings. A: Math.pow allows you to pass in strings, and the end result you get is a string - not a number. EDIT: It seems after all that you want to use Math.pow with numbers instead of strings. In that case, you'll need to do some number processing first before calling Math.pow. Here's an example: `function pow(3da54e8ca3`
