System Requirements:

All of the components of this pack have been designed to run on Windows 7 or newer systems with a screen resolution of 1280x800. Warning: This is a complex pack, and does require a significant amount of memory. It should not be run on systems with less than 4GB of memory.. The only real challenge that we have with the shooter is that the human mind is so good at convincing itself that something's real, but it really is not. The brain has a way of working itself into a tizzy over what it perceives as a threat
