Beginning in the fall of 2000, when German Center for Theater Research (Deutsches Theatermuseum) conducted a questionnaire to determine the most important theatrical histories of the twentieth century, Nöcker identified himself as the author of four books (including In der Lage and Bühnenmensch) by Ingeborg Wagner. The film of Bühnenmensch won the special prize for best film at the Karlovy Vary International Film Festival in 2002.Natural and artificial variable aptamers of different size against bovine insulin with different binding efficiencies. Natural aptamers against human and bovine insulin have previously been identified. Aptamers against bovine insulin have now been identified in a larger selection as well. In order to search for better aptamers than found in the earlier study, the selection procedure has been modified by using the binding buffer with a lower concentration of KCl. When repeating this selection procedure with an initial enrichment of only 24 clones, the best binding aptamer clone has been improved, in this case from titer of 0.27 to 1.29. The amino-acid sequence of this aptamer was used to design a library of artificial hairpin-shaped aptamers with mutations at both the 5'-end and 3'-end of the aptamer sequence. In a sequencing study of 110 clones from this artificial library, which used similar screening conditions as for the natural aptamer selection, new naturally occurring variable aptamer candidates were identified. After selective PCR amplification of the PCR product from these inserts, the DNA sequence of the aptamer was characterized. In a competition test of the best aptamer in the artificial library versus the natural aptamer, the difference in K(d) was about twofold. By using nuclear magnetic resonance (NMR) spectroscopy, these artificial aptamers were found to be structurally close to the natural aptamers, except for the length of the stem of the hairpin structure.[Myasthenia gravis: report of 9 cases]. Myasthenia gravis is a very rare disease. We report the clinical, electrophysiological and immunological data of 9 patients from an investigation from the records of the neurology department over a period of 8 years. The mean age of patients was 38 years (range: 29-55). The sex ratio was 1.4. All patients had a classical clinical picture. Progression of the disease was very variable according to the initial clinical and electroph

All other things working fine (SQL queries, PHP sessions, CURL, et al). We have a shared hosting account at Yahoo, which happens to use CloudFlare to route our HTTP and HTTPS traffic. The problem we're having is that our https requests are timing out on our live site. We are able to connect to the live site (via Google) and the SSL certificate works. When we try to connect to our https site through we get a (faulty) certificate error. We have looked at the packets coming in and they are technically valid, but there is a problem with our SSL certificate. The certificate is served to us by Google through CloudFlare. We are not related to this certificate, we did not get it from Google (although we do happen to have it installed on our development machine). The certificate itself is valid, we've been able to validate it with several online SSL certificate checkers. What could be causing this? A: The most likely problem is that the certificate is self-signed and the CloudFlare process may not be validating the signature of the certificate. This should be fixed by making a request to the CloudFlare support team to fix the certificate. Q: How to display a image as a background in swift with Xcode I am trying to figure out how I can display a image as a background in X
